phpGroupWare

2.4. tables_update.inc.php (Recommended)

2.4.1.

\$db1 is a copy of \$phpgw_setup->db, to avoid potential conflicts with the rest of setup's db activities.

In addition to the basic API db class functions, schema_proc introduces the following special functions:

```
function DropTable
```

- AddColumn:

There are additional functions within schema_proc, the majority of which are not

2.7. language files (Required)

2.7.1. All applications should have at least a file of English translations, used for their application lang() calls.

- Format of a lang file:

```
{phrase}{TAB}{appname}{TAB}{LANG_CODE}{TAB}{translation}
```

e.g:

```
first name      common      en      First Name
```

```
first name      common      en      First Name
```

3.2. schematoy.php

3.2.1. Runs the full cycle of upgrades, including

4. The install/upgrade process

4.1. Overview

4.1.1. Setup

phpGroupWare

4.3.2. Selection

Within applications.php, a color-coded matrix of application status

5.1.2. Default 0

For int fields, a default
